

Wood & Feed Hammermill

As the main hammermill supplier in China, we are professional in feed industry related in pelletizing machinery. Wood & Feed Hammermill is one of our main products. SFSP-series is one kind of water drip type advanced hammermill in China.

Except widely used to crush each kind of straw, wood chip, tree branch, bark and leftover bits from agricultural wastes in pelletizing plants, SFSP-series can be also used as feed hammermill in the grinding of animal, pet, livestock, poultry, aquatic and other feed ingredients.

Water Drip Figure Vibrate Hammermill

Crush raw materials such as corn, cotton seeds waste, bean waste. 95% can get through 60 meshes, no block.

Production efficiency is one-up in the world. When screen vibrates, the efficiency could be increased by 20-300%; By experiment, use 75Kw vibrate hammermill, impulse fan 5.5Kw, mesh diameter 1.2mm, the capacity to crush corn is 6 t/h. Degree of fineness: 98% get through 24 meshes (0.85mm), 80% get through 65 meshes, 49% get through 80 meshes.

Auxiliary facilities are the same simple as ordinary water drip hammer mill. The power doesn't increase.

So it's very easy to update the old machine.

The machine is stable and reliable. Vibrator, elastomer, screen can be replaced outside the machine.

Water Drip Figure Hammermill

Adopting international modern technic, crush room is designed to be water drip figure. Secondary crushing can increase output by 25%. Adjustable hammer-screen space can optimize hammers' arrangement. One mill can work as ordinary crusher and miro crusher.

Full open operating door; coordinated screen fixing device; easy to replace and repair screen

Safe and environmental: inlaid airproof avoids the dust from overfall thoroughly.

Be tested by precise balancing apparatus, then the hammer mill will keep actionless when run. This reduces noise and protracts bearing's life.

The crusher is widely used in feed factories to produce poultry feed, aquatic feed; also in alcohol plants, citric acid plants, food product factories to crush pellet material.

We offer you all kinds of Feed Hammermill and Wood Hammermills.
